

ABSTRACT OF THE DISCLOSURE

5 An automatic portion control system, comprising: a dispensing
mechanism adapted for dispensing a first substance into a container; a scale
adapted for weighing said container; and control circuitry adapted for reading a
container weight from said scale and controlling said dispensing mechanism
accordingly. The invention further comprises a method for dispensing a product
10 into a container, comprising the steps of: weighing a container; and dispensing
the product into the container until reaching the estimated filled weight of the
container.
